

Precision for Aesthetic Beauty

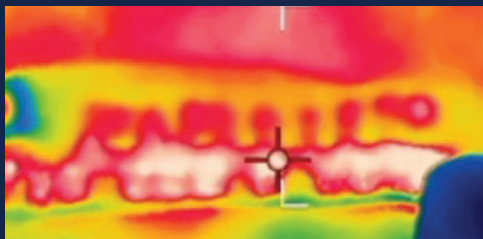

Exceptional Treatment Yields the Best Outcomes — Always.

The ALPHA Pro Multi-Application Workstation combines a 3rd generation high-speed 808 nm diode for efficient hair removal with advanced 3D IPL technology. This technology addresses common patient concerns such as sun-damaged skin, pigmentation, and redness. Ideal for any practice, ALPHA Pro enables providers to achieve superior outcomes and offer an enhanced treatment experience.

Meticulously Designed to Enhance Treatment Precision

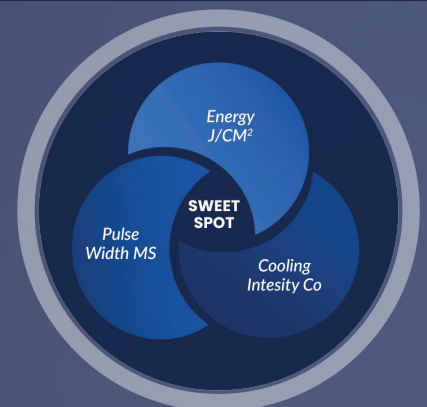

The ALPHA Pro 808nm laser diode utilizes Power Motion Technology. This innovative technology employs heat diffusion to transmit energy not only to the hair follicle but also to the bulge and dermal papilla, which are crucial components associated with hair regeneration. Additionally, the device includes MILO, the Melanin Meter, which assesses the patient's skin type for a personalized experience. Furthermore, it incorporates advanced contact cooling, enhancing safety and comfort during treatments while also reducing acidity and preventing platelet coagulation.

This thermal image compares Power Motion vs. single pulse and heat deposition during the same period of 11 second. The Power Motion side shows faster treatment and an increased thermal footprint.

Advancing in technology, ALPHA Pro's IPL lets users customize treatments by adjusting energy, pulse width, and cooling intensity.

Additionally, the Bright & Tight™ application incorporates the principle of diffusion, gently warming the top layers of skin to improve skin tone and texture.

Premier Solutions for Your Patients and Your Practice

Laser Hair Removal and IPL skin revitalization are the most sought-after aesthetic procedures, forming a pivotal foundation within any esteemed aesthetic practice. The Power Motion hair removal mode makes treatment quick and easy for increased patient comfort.

Alpha Pro's Bright & Tight™ signature IPL procedure is one of 20 possible treatments to help you differentiate your practice and offer your patients the most in-demand solutions.

Benefits to Your Practice

Advanced Technology

- Power Motion Technology – 3rd generation hair removal
- Large 4.5 cm spot size for faster treatment
- Independently selectable IPL modes

Customized Solution

- Milo, The Melanin Meter, diagnostic guide to customize your treatment settings
- Advanced independent selectable cooling for increased comfort
- Preset modes for guided treatments

Practice Builder

- Over 20 treatment possibilities
- Bright & Tight™ signature treatment
- An excellent addition to any practice
