

Dual Plasma Derma Revitalization System

The Future of Plasma Technology

AESTHETIC
MANAGEMENT PARTNERS

The Power of Restoration in Your Hands

Elevate Your Practice with This Dual Plasma Innovation

PlaDuo_{pro} is the world's first and only dual plasma device, integrating both nitrogen and argon plasma technologies to create a unique combination of thermal and chemical reactions within the skin. This revolutionary approach stimulates collagen production straightening the skin's foundational structure, refining skin texture, reducing fine lines and wrinkles and acne-prone skin, and ultimately enhancing overall skin health. With no to minimal downtime and maximum efficacy, PlaDuo_{pro} offers a transformative experience for patients of all skin types.

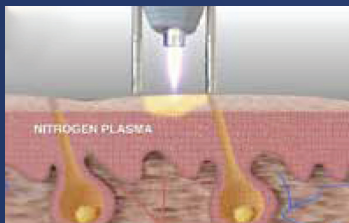

Mechanism of Action

PlaDuo_{pro} utilizes plasma, often referred to as the fourth state of matter, created by superheating gas until electrons are stripped away, forming ionized gas.

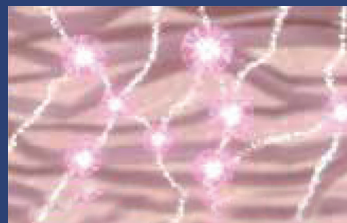

This ionized gas is delivered to the skin through **SpinShot Technology**, an advanced spinning action that enhances penetration and coverage, creating controlled micro-injuries that trigger the skin's natural healing response. The result? Boosted collagen production, accelerated cellular renewal, and visibly firmer, healthier, and more youthful-looking skin.

Dual plasma sources for maximum advantage can be used separately or combined to optimize outcomes.

Nitrogen Plasma Mode

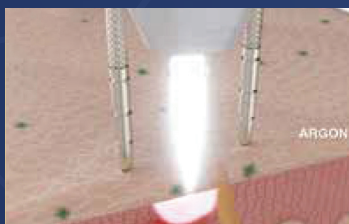

Nitrogen plasma energy is generated and delivered into the skin.

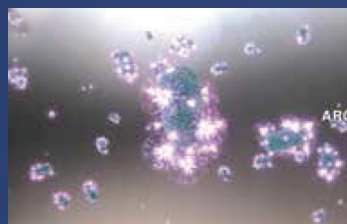

Nitrogen plasma penetrates the skin, converting into energy that stimulates neocollagenesis.

Argon Plasma Mode

Argon plasma energy is released into the skin.

A photochemical reaction occurs, eliminating bacteria and promoting skin balance.

Where Patient Satisfaction Meets Practice Success

PlaDuo_{pro}, the next-generation skin revitalization system, is engineered to deliver powerful yet gentle treatments that restore, revitalize, and enhance the skin's natural beauty.

PlaDuo_{pro} allows practitioners to seamlessly switch between nitrogen and argon plasma in a single treatment session, creating microchannels in the skin, stimulating the breakdown of old cells, and encouraging regeneration. PlaDuo_{pro} delivers the versatility, precision, and results your patients expect—while driving increased profitability for your practice.

Benefits of PlaDuo_{pro}

Next-Generation Innovation

- The world's first device to offer both nitrogen and argon plasma treatments within a single system.
- Patented **SpinShot Technology** ensures stable and controlled plasma generation, allowing practitioners to customize treatments effectively.
- The system provides 15-step energy control, enabling precise adjustments to cater to individual patient needs.

Transformative Skin Revitalizing Solution

- Addresses the most in demand procedures. Minimally invasive with long-term results.
- Revitalizes skin from within.
- Restores skin equilibrium while enhancing dermal vitality.

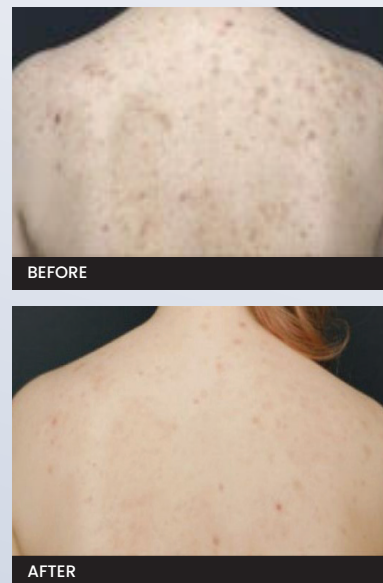

Enhance Your Treatments and Your Practice

- Delivers advanced procedures for a wide variety of skin types.
- Elevates patient satisfaction with customizable treatments.
- Versatile Treatment Capabilities address high-demand applications, driving increased revenue potential.
